EasySlide One-Hand Bosshead

Item no. 2450 NEW

The new EasySlide bosshead from USBECK is revolutionizing laboratory setups: thanks to an integrated **ball bearing**, the bosshead glides smoothly along the rod – even during fine adjustments.

Its innovative design allows for **quick, comfortable, and secure one-handed operation**, making height adjustments significantly more **efficient and ergonomic**.

The large, easy-to-grip knurled aluminium screws can be firmly tightened without tools, ensuring long-term reliable fixation – even with frequent repositioning.

Technical features:

- Sturdy and lightweight aluminium alloy
- Suitable for fixation of rods up to Ø?12?mm
- The bosshead itself mounts on a Ø?12?mm rod where it is flexibly height-adjustable
- Internal plastic ball bearing for exceptionally smooth sliding
- One-handed operation – bosshead can be positioned and locked effortlessly with one hand
- Large aluminium knurled screws for secure, tool-free tightening
